SUCCESS!

You have successfully enabled connectivity to your Proofpoint environment.

Onboarding should commence shortly. Generally, the time required to complete the onboarding process may differ from environment to environment, and is directly related to the amount of data (users, files, events, etc.) stored in your cloud service.

We will update you on how the onboarding process is progressing.

User names and email addresses may be protected by data privacy regulations. By enabling the application you authorize Proofpoint to use this personal data in connection with the TAP SaaS Defense service. Proofpoint protects and processes personal data in accordance with its Privacy Policy and the Proofpoint Trust site.
